Rich, I think the first item we need to address is odor. The complaints coming in are about odor, is it harmful? Am I going to get sick? Bob

Subject: Draft Fact sheet

OK, here is a *very very very* rough cut of a fact sheet to address the requests from your region. I think some of it is way too long, but it is one page front and back. It is usually easier to cut than to add. We need to fine tune the science to make sure what we think is what is real. The basic concepts came from the ToxFAQs and some site specific info I found at NOAA. Hopefully, John, James, Jim, and Bruce can help with critical reviews on the science and perhaps Dagny with language, tone, and format? My big concern at this point is whether the topics are comprehensive enough given that this will get mixed – and, like as not, matched – with other agency's info at the Joint Information Center to complete the whole picture for the public.

Anyway, take a look and let me know.

Rich Nickel
